<b>DRIVETRAIN</b>																																																																																									
No leaks of any kind (oil, coolant, trans fluid, etc)																																																																																									
All fluids at acceptable levels																																																																																									
Belts in good condition & properly tensioned																																																																																									
Hoses in good condition & secured properly																																																																																									
Engine mounts not significantly worn																																																																																									
Engine cradle/front subframe appears straight																																																																																									
Wiring properly secured/No exposed or frayed wires																																																																																									
Throttle is responsive & does not stick																																																																																									
Transmission shifts properly/smoothly																																																																																									
Clutch pedal releases properly & clutch does not slip																																																																																									
Systems in overall good functional condition																																																																																									
<b>WHEELS &amp; TIRES</b>																																																																																									
Tread depth above minimum level																																																																																									
Tires manufactured within past 4 years																																																																																									
No signs of cracking/tread separation																																																																																									
No signs of leaks/punctures/deformities																																																																																									
Wheels not damaged or structurally compromised																																																																																									
Lug nuts torqued to spec																																																																																									
Wheels & tires are in overall good condition																																																																																									
<b>RUNNING GEAR</b>																																																																																									
Headlights & taillights operate properly																																																																																									
Turn signals operate properly																																																																																									
Brake lights checked																																																																																									
Windshield wipers function/Wiper blades in good shape																																																																																									
Windows go down easily																																																																																									
Running Gear is in overall good condition																																																																																									
<b>STEERING &amp; SUSPENSION</b>																																																																																									
No excessive steering freeplay																																																																																									
Wheel bearings checked; no excessive wheel movement																																																																																									
Suspension mounting points are solid																																																																																									
Tie rods secure; no significant signs of wear																																																																																									
Ball joints in good condition; boots not torn																																																																																									
Dampers show no signs of leakage/damage																																																																																									
Bushings are in good condition																																																																																									
System components are in overall good condition																																																																																									
<b>BODY &amp; CHASSIS</b>																																																																																									
Windshield is not cracked																																																																																									
No structurally weakening or functionally damaging rust																																																																																									
Mirrors are secured properly																																																																																									
All body panels are secured																																																																																									
No signs of shoddy repair to structure/chassis																																																																																									
No significant existing damage to body or chassis																																																																																									
Systems in overall good functional condition																																																																																									
<b>OCCUPANT RESTRAINTS</b>																																																																																									
OEM 3-point belt for driver seat																																																																																									
OEM 3-point belt for passenger seat																																																																																									
Aftermarket 5/6 point harness for driver seat																																																																																									
Aftermarket 5/6 point harness for passenger seat																																																																																									
4 point Schroth anti-submarine belt for driver seat																																																																																									
4 point Schroth anti-submarine belt for passenger seat																																																																																									
Equipped with restraints not listed above																																																																																									
All occupant restraints mounted safely & securely																																																																																									
<b>BRAKES</b>																																																																																									
Brake fluid is clean & at acceptable level																																																																																									
Brake pedal is firm																																																																																									
Brake pads thickness at least 50% of new																																																																																									
No leaks of any kind in the system																																																																																									
Rotors show no signs of cracking/warpage																																																																																									
Brake System is in good functional condition																																																																																									
<b>EXHAUST SYSTEM</b>																																																																																									
Secured properly & does not hang down																																																																																									
No noticeable signs of exhaust leaks																																																																																									
Components in overall good condition																																																																																									
<b>BATTERY</b>																																																																																									
Battery is properly secured																																																																																									
Battery posts are covered																																																																																									
No severe corrosion on/around battery area																																																																																									
No signs of leakage or deterioration																																																																																									
<b>SEATING</b>																																																																																									
Equipped with OEM driver seat																																																																																									
Equipped with OEM passenger seat																																																																																									
Equipped with aftermarket driver seat																																																																																									
Equipped with aftermarket passenger seat																																																																																									
Seats are securely mounted																																																																																									
<b>OTHER EQUIPMENT</b>																																																																																									
SA2010 helmet or newer; undamaged																																																																																									
HNR/HANS device in good condition																																																																																									
Fire suppression system																																																																																									
Arm Restraints																																																																																									
<b>ROLLOVER PROTECTION (Check one)</b>																																																																																									
Approved roll bar/roll cage**																																																																																									
Factory equipped NC/ND rollover protection																																																																																									
<b>(E Group (Novice) only)</b>																																																																																									
<b>**Multi-point (MINIMUM. 4 pt) bar with fore/aft</b>																																																																																									
bracing (e.g. Hard Dog, Blackbird)																																																																																									
<b>NO STYLE BARS ALLOWED</b>																																																																																									

Qualified Inspector/Shop Name: \_\_\_\_\_ Date: \_\_\_\_\_

**OPEN TOP VEHICLE WAIVER (MANDATORY SIGNATURE REQUIRED REGARDLESS OF VEHICLE)**

I acknowledge that driving/riding in a convertible or any open-top vehicle, even with proper safety equipment, could result in serious injury or death. The use of safety equipment, including but not limited to roll bars, cages, a helmet and/or restraints, is not a guarantee to avoid injury. I accept the risk and release the organizers, racetrack, owners, participants, and Miata Reunion from any liability resulting from my decision to drive/ride in a convertible or open-top vehicle on track.

Driver: \_\_\_\_\_ Date: \_\_\_\_\_

**LIABILITY ACCEPTANCE (MANDATORY SIGNATURE REQUIRED)**

By signing this Tech Inspection Form and Waiver, I acknowledge and attest that a qualified mechanic has performed the above inspections and any deficiencies have been corrected. I acknowledge and agree that I am fully and solely responsible for the condition and suitability of my vehicle and helmet for use in this event, as well as for any vehicle problems, malfunctions, or damage that may occur in connection with the operation or performance of my vehicle prior to, during, or subsequent to the Miata Reunion Event. I release Miata Reunion and any persons involved with this event from any liability arising from a failure of this vehicle, helmet, or safety equipment for any reason, including, but not limited to, the failure of the technical items listed above.

Driver: \_\_\_\_\_ Date: \_\_\_\_\_
